Dear Sirs

Docklands Light Railway – Stratford International Extension Project Application for Order under the Transport and Works Act 1992

At their meeting last evening the consultative committee received a detailed briefing on this project given by Richard de Cani, Head of Development and Planning at the DLR.

After discussion the Committee asked that I should write expressing their strong support for the project. Since the extension is a key ingredient in the public transport infrastructure for the Olympics in 2012 the Committee hope that you will be able to approve the order applied for in good time to allow the project to be completed as presently scheduled.

For your information the Consultative Committee is an independent body established pursuant to section 35 of the Civil Aviation Act 1982 to provide a forum for the discussion of all matters concerning the development or operation of the Airport which have an impact on the users of the Airport and on people living and working in the surrounding area. For more information visit our website at www.lcacc.org

Yours faithfully

Stuart Innes
Secretary
